Javascript Week 2, Exercise 3

Build a form to allow the user to input two numbers, get them from the page, and then add them together.

- Create two input fields for the user to enter numbers into
- Create an output element for the user to print out the total to
- Create a button to call your add function
- Create a function that grabs the two numbers, adds them together, then outputs the total

---

OUTPUT

| Number 1 | + | Number 2 | = |

12

| 5 | + | 7 | = |
